

W30

Well-child Visits in the First 30 Months of Life

Why it Matters

Well-care visits offer providers the ability to influence patient health and development and are a critical opportunity for screening and counseling. These routine visits also help ensure children are up to date on required vaccinations.¹

Eligible Population

- **Well-Child Visits in the First 15 Months:**

Children who turn 15 months old during the measurement year. Calculate the 15-month birthday as the child's first birthday plus 90 days.

- **Well-Child Visits for Age 15 Months–30 Months:**

Children who turn 30 months old during the measurement year. Calculate the 30-month birthday as the second birthday plus 180 days.

Measure Description

The percentage of members who had the following number of well-child visits with a PCP during the last 15 months. The following rates are reported:

- **Well-Child Visits in the First 15 Months:**

Children who turned 15 months old during the measurement year: Six or more well-child visits.

- **Well-Child Visits for Age 15 Months–30 Months:**

Children who turned 30 months old during the measurement year: Two or more well-child visits.

Key Tips

- ✓ Visits must be with a PCP. The practitioner does not have to be the practitioner assigned to the child.
- ✓ Well-care visits can be performed anytime in the measurement/ calendar year.
- ✓ As of 2025, telehealth visits are no longer eligible for gap closure.

+ Measure Codes

Be sure to use age-appropriate codes.

CPT: 99381, 99382, 99391, 99392, 99461

HCPCS: G0438, G0439, S0302
